PROFILE

Fullstack developer focused on shipping complete products, from database to interface. Currently a **fullstack developer at AIDDA Platforms**, in the **6th term of Information Systems** at FIPP and a **PIBITI/CNPq research fellow** at FCT-UNESP, automating tests of nanotechnological energy harvesting devices. Solid experience with **React, TypeScript, Java Spring Boot** and **Python**, including production integrations with payment gateways, generative AI and relational databases.

TEAMWORK

NEGOTIATION

EXPERIENCE

Fullstack Developer

FEB 2026 – PRESENT

AIDDA Platforms · Internship · Remote

- End-to-end admin impersonation: one **RBAC** resource on the API reflected across every module of the web and mobile apps
- Extracted filtering, pagination and totals into a shared **TypeScript library** consumed by both the web and mobile apps
- Authentication with **Keycloak**: user CRUD, RBAC overrides, forced password reset and IP auditing
- Integrations with **Protheus** and **SharePoint**, migrating mocked screens to **PostgreSQL** persistence

Technological Initiation Fellow (PIBITI)

SEP 2025 – PRESENT

FCT-UNESP / CNPq

- Automation of the test that characterises **nanotechnological energy harvesting devices**
- Closed-loop control of the **pneumatic actuators** that generate the piezoelectric stimulus, reading the response in real time
- **Python** software that runs the test end to end, records the data and tracks the curve live
- Patent application for the equipment **filed with the INPI**

PROJECTS

ContabilPro

2025

Digital onboarding SaaS for accounting firms. An 8-step wizard, CPF validation, Brazilian document masks, full LGPD compliance and auto-fill via postal code and Gemini AI.

REACT 19

TYPESCRIPT

SUPABASE

GEMINI AI

QuoteFys

2025

SaaS for automated quote generation. 12 PostgreSQL tables with RLS, MercadoPago subscriptions via HMAC webhooks, WhatsApp automation through Twilio and PDF generation.

REACT

TYPESCRIPT

SUPABASE

VERCEL

BomServiço2025

Classifieds platform for service providers. JWT authentication, image upload, messaging system and an admin panel.

JAVA

SPRING BOOT

POSTGRESQL

JWT

Market Forecasting with ML2025

Machine learning pipeline for financial index forecasting. Random Forest, AdaBoost and MLP with technical indicators (SMA, RSI, MACD). 52.78% accuracy on the MLP model.

PYTHON

SCIKIT-LEARN

PANDAS

NUMPY

DOARC2025

Donation management system for an NGO. Dashboard, full CRUD, inventory control, delivery scheduling and reports with PDF/Excel export.

JAVA

SPRING BOOT

POSTGRESQL

REST

OS-Style Portfolio2025

Portfolio built as an operating system in the browser. Custom window manager, terminal with 25+ commands, 11 Canvas games and a scientific calculator. Over 10,000 lines of vanilla JS.

JAVASCRIPT

CANVAS API

WEB AUDIO

ES MODULES

EDUCATION

BSc in Information Systems2023 – 2027

FIPP – Presidente Prudente School of Informatics

Technological Initiation – PiezoelectricityONGOING

LabElTec – FCT UNESP · PIBITI/CNPq fellowship

→ Research in nanotechnology and piezoelectric materials
